Sample Candidate F

sample.candidate@example.com | +91 98765 43210

Summary

Student building assistants that answer questions from documents using large language models.

Education

B.Tech in Computer Science and Engineering, Sample Institute of Technology, 2022 - 2026

Skills

Languages: Python

AI: LLM, RAG, LangChain, prompt engineering, vector databases, deep learning

Backend: FastAPI, REST API, Git

Projects

Document Question Answering Assistant

- Used retrieval augmented generation (RAG) with LangChain and a vector database to answer questions from PDFs
- Wrote prompt engineering experiments to improve answers and exposed the assistant through a FastAPI REST API
- Managed the code in Git
