Sample Candidate D

sample.candidate@example.com | +91 98765 43210

Summary

Student who builds systems that understand images and video.

Education

B.Tech in Computer Science and Engineering, Sample Institute of Technology, 2022 - 2026

Skills

Languages: Python

Vision: OpenCV, YOLO, CNN, image processing

Libraries: PyTorch, NumPy, Matplotlib

Tools: Linux

Projects

Helmet Detection

- Trained a YOLO model to detect helmets in traffic camera video and measured accuracy with Matplotlib plots
- Used OpenCV for image processing steps such as resizing and filtering

Plant Disease Classifier

- Built a CNN in PyTorch using deep learning to classify leaf photos
- Prepared image arrays with NumPy on a Linux machine
