Sample Candidate B

sample.candidate@example.com | +91 98765 43210

Summary

Student interested in building machine learning models and deploying them as simple services.

Education

B.Tech in Computer Science and Engineering, Sample Institute of Technology, 2022 - 2026

Skills

Languages: Python

Machine learning: scikit-learn, Pandas, NumPy, MLflow

Deployment: FastAPI, Docker, Git, AWS

Projects

House Price Predictor

- Trained regression models with scikit-learn and tracked the experiments with MLflow
- Wrapped the best model in a FastAPI service and packaged it with Docker

Customer Churn Model

- Compared several machine learning classifiers using cross validation and Pandas for feature engineering
- Deployed the service on AWS and kept the code in Git with a CI/CD pipeline using GitHub Actions
